

3D Part Prototyping

CNC, SLS, SLA & Short Run Production

Need to turn your design into reality? We can help you with prototype parts using a variety of methods including CNC, SLA, SLS and even short run production from 3D files using silica gel molds. We can provide quotes typically within 48hrs and production within short lead-times from our China plants.

Benefits of CNC

We can provide prototypes using CNC Milling that allows real use testing of parts because 'real' materials can be used. Raw materials are available to suit various applications including ABS, PC, PMMA, Nylon, Aluminium and various other metals. CNC prototypes do not have the 'stepping' seen in other additive processes. Parts can be finished using spray coatings, screen printing and even electroplating.

What do i need to get a quote?

We require a 3D files in any of the industry standard file formats. Simply email a file for quote.

Why use i-Keytec?

Australian Support, Hong Kong Based Engineering, in-plant AQL testing prior to shipping.

Easy, Dependable, Cost Effective product sourcing. **Call us now to quote on your project!**

Other Products & Services

- Injection Molding
- Aluminium Extrusion
- Die-Cast Aluminium
- PCBA
- Fabricated Metalwork
- Stainless Steel Faceplates
- Custom Cables
- Wire Harness
- Full Turn-Key
- Product Accessories including
 - Leather Cases
 - Silicone Protective Cases
 - Product Packaging
 - Product Manuals
