

Injection Molding

Plastic Injection Molding

We can provide injection molded plastic parts and cases to your specific designs. We have machines from 50 tonnes to 400 tonnes capacity in both horizontal and vertical orientations allowing us to fulfill virtually any requirement.

What we can do

We can produce parts from simple designs to those requiring double-shot, over-molding and insert molding techniques. We can also provide surface spray coatings, electroplating and other finishes on request.

What do i need to get a quote?

We require a drawing in any of the industry standard 3D file formats. Simply email the details for a quote.
